## PROFESSIONAL PROFILE

The traits that distinguish me are sensitivity, pragmatism and the will to always seek a profound meaning in projects. I graduated in Design and I specialized in Graphic and Visual Design by self-taught and through various internships in important studios including Valentina Cresti & Associati in Italy and Estudio MABA in Spain. I graduated with a thesis on Brand Design applied to the winery. I have been working as a freelancer for 3 years, mainly carrying out Label Design and Logo Design projects. In the last year, I have also added Web Design, Photography and Content Creation projects to this activity. Passion is the secret ingredient that is the basis of all my projects. I believe that every project must be studied and carried on upon the client needs and also the client should be involved in the process in my opinion.

---
